EDUCATION

BS Artificial Intelligence

Dawood Univ. of Engineering. & Technology

Oct 2024 – Present

CGPA: 3.69 | LAST SEMESTER GPA: 3.77

Focus: AI & ML | Data Science |
Algorithmic Optimization

Intermediate (pre-engineering)

Liaquat Govt. Girls College

Graduated 2023

Matriculation

SOS Herman Gmeiner H.S. School

Graduated 2021

TECHNICAL SKILLS

Languages: Python (Adv.), C++, Java, SQL, PHP

Data Science Tools: Pandas, NumPy, Matplotlib, Seaborn, Tableau

ML / DL: Scikit-learn, TensorFlow, PyTorch, Keras

Web Frameworks: Laravel, Flask, FastAPI

Deployment: Flask, FastAPI, Streamlit, Docker, Railway

Cloud: AWS, Azure, Google Cloud

AI: EDA, Supervised Learning, Neural Nets

CORE STRENGTHS

- Critical Thinking
- Team Collaboration
- Clear Communication
- Fast Learner
- Adaptability

PROFESSIONAL SUMMARY

AI undergraduate (CGPA 3.69, Lat Sem GPA 3.77) skilled in Python, Machine Learning, and Data Analysis with hands on experience building and deploying ML/NLP models, data dashboards and AI-powered applications end-to-end. Demonstrated expertise through academic projects, competitions, and Microsoft Learn certifications, with a proven ability to apply AI concepts to real-world challenges. Seeking an internship to contribute technical skills, innovative problem-solving, and collaborative energy to impactful AI/ML projects.

TECHNICAL PROJECTS AND DEPLOYMENTS

Chest X Ray-CNN-Temporal-Analysis | [Live Demo](#)

- Designed and evaluated **3 CNN architectures** for pneumonia classification (synthetic RSNA-inspired dataset); best model achieved **90% accuracy, 0.95 AUC-ROC, 93% sensitivity**.

Sentiment Analyzer | [Live Demo](#)

- Built and deployed a real-time NLP sentiment analyzer (DistilBERT, HuggingFace/PyTorch) via Streamlit; **~91% accuracy** on SST-2 benchmark, full pytest test coverage.

Pakistan Socioeconomic Dashboard | [Live Demo](#)

- Built an interactive **Streamlit dashboard** analyzing Pakistan's socioeconomic indicators (2019–2024) with dynamic year-range and city filtering; data compiled from SBP, PBS, and World Bank/IMF sources.

Karachi Watts | [Live Demo](#)

- Built an AI load-shedding predictor for Karachi; compared 3 ML models, selected Random Forest ($R^2=0.991$, MAE=0.26h); integrated with a **Groq LLM chatbot** and **Streamlit dashboard**; built with **Python + ML**.

Al-Bayan

- Built a full-stack Quranic study app (**React, Flask, SQLite**) with real-time streaming **AI chat** (Groq/LLaMA 3.3 70B); bilingual tafseer, thematic verse search, and bookmarking across all 6,236 ayat.

Jira To-Do List (Software Engineering Project)

- Built a CLI To-Do app in Python (CRUD, persistent JSON storage) with an **8-test pytest suite (100% pass rate)** using isolated test fixtures to prevent state leakage between tests.

Team Tasks | Personal Project

- Built a full-stack team task manager (**Laravel 11, PHP 8.3, MySQL**) with a Kanban board, email-based team invitations, and role-based authorization implemented via Laravel Policies (Owner/Member permission tiers); includes a PHP Unit test suite.

COMPETITIONS & CERTIFICATIONS

Deloitte Data Analytics Job Simulation | Forage | June 2026

- Analyzed factory telemetry data using Tableau; identified highest downtime factory and root cause device type.
- Classified gender pay equality scores across job roles using Excel forensic analysis.

LangChain Mysteries — PROCOM'26 | FAST NUCES | February 2026

- Solved real-world AI tasks including Audio Intelligence (Speech-to-Text), Document Forensics, and AI-powered reasoning using LangChain. Collaborated in a team of 4 under time constraints.

Microsoft 365 Copilot Masterclass | Microsoft Learn | March 2026

- Completed a Masterclass on prompt engineering and AI-powered productivity tools. Earned multiple batches.

Generative AI Tools & Frameworks | AIS, Dawood University | Dec 2024

- Explored the evolving GenAI landscape, modern AI tools, and practical frameworks for Gen-AI development.
